

ChatGPT Trading Theory Handoff

For background on the trading thesis, signal vocabulary, research philosophy, and methodological guardrails developed during the ChatGPT planning sessions, see:

`docs/CHATGPT_TRADING_THEORY_HANDOFF.md`

That document explains the “why” behind the implementation: SPY intraday directional-edge research, VWAP/EMA/support-resistance/structure/retest/false-break hypotheses, causal/no-lookahead discipline, why options and live execution were deferred, and why “no valid edge” is an acceptable result.
